DELI TWIST

OPEN SAFE, NO LEAKS

Easy, safe, reusable and recyclable

SCAN QR CODE

Easy, safe, reusable and recyclable. DeliTwist has a tight closure with a smooth opening that avoids spilling its content. This pot can be reused to extend its lifecycle and recycled as it is made of recycled PET to save our precious natural resources.

DeliTwist, a thermoformed screw-top pot, offers a cost-efficient, convenient and sustainable solution for all products that need to pack in a leak-resistant container. The lid's smooth operation avoids spilling, and when closed, does not leak. DeliTwist is suitable for a wide range of food and non-food products.

Designed with consumers in mind, DeliTwist can be reused to store food at home, carry lunch or buy products in bulk. DeliTwist is made from rPET that contains up to 100% post-consumer waste that allows both lid and container to be fully recycled to produce new pots, making it an ideal sustainable packaging solution.

Smooth open or close by twisting lid

Made with recycled PET contents
Reusable and Recyclable
