SPRAY APPLI- CATOR

LESS IS MORE

Less is more. Easy mix as you spray.

The new Spray Applicator has been designed to offer the perfect combination of functionality and user experience from our previous generation. With further improvements including an on/off flow control slide, allowing the user to control the flow without having to turn off the tap.

Centred around the design philosophy, "Less is more", the Spray Applicator triumphs its rivals by minimising the components used and simplifying assembly. It is also fully compatible with existing containers, labels or boxes, eliminating any cost to change to the new design.

Keeping in-line with Caps & Closures's values of Sustainable Success, we place great focus on improving water-saving capabilities. The Spray Applicator is specifically designed towards assisting with Australia's strict water restrictions.

Unique benefits:

- Water-saving designed switch
- Simple ergonomic design
- Auto-dispersal, no premix
- Sustainability through Reusability

Specifications:

- 38mm calibrated thread
- Suitable for HD bottles
- Body and Plug can be different colours
- 16:1 mixture ratio*
(varies based on water pressure and viscosity of the liquid being drawn)
- Available with different dip tube lengths
- Available with locking lugs
