FLAIROSOL

MISTIFYING SOLUTIONS

Mistify your world!

SCAN QR CODE

The next generation trigger-based dispensing technology has arrived! Flairosol delivers a better spray quality than other brands and it is comfortable to use. The fine mist combined with continuous spray creates a user experience unlike any other device. It easily covers large areas from the first to the last drop.

The clever re-useable head and convenient refill solution ensures a more responsible option while enabling brands and consumers to move away from the environmental, health and safety hazards of conventional aerosols.

Fine Mist

High-quality mist like spray evenly and perfectly on all surfaces.

Consistent Spraying

A fixed output of 1.20cc per second is dispensed consistently from the first to last drop.

Continuous Spraying

Repeated actuation produces an endless spray allowing large areas to be covered quickly and easily, without gaps.

Upside Down Spraying

360° spraying for those areas which are difficult to reach.

Airless

Complete air isolation enhances formulation integrity.

Every Last Drop

No wastage with close to 98% liquid evacuation

Unique benefits

- Fine mist
- Propellant-free
- Continuous spray
- 360° application
- Unique design
- Product isolation
- Refill packs
- Non-pressurized container
- Low noise performance
