CLOSURES

SECURE FLIP

A NEW GENERATION
SPORTS CAP

AVAILABLE IN
28 MM / 29 MM

Ideal for various beverage applications such as bottled waters, juices and sport drinks!

The new Secure Flip has been designed to offer a perfect combination of functionality, safety and style while meeting the lifestyle of today's consumers, with more and more eating and drinking on-the-go.

Consumer safety – particularly for children – and high quality construction were critical to the design and development of the closure. For this reason Secure Flip conforms to the BSDA and EN71 safety standards, giving assurance that all consumers can drink safely out of the bottle. This unique sports closure also features a patented non-detachable tamper-evident band that enables users to easily and visually assess that the product has not been altered since it left the manufacturer or filler.

Easy to hold, open and reseal, this new generation of sports cap has been tailored to end users' needs. In addition, the "click" sound at both the opening and closing operations provides further reassurance for consumers who want to enjoy their drinks anytime, anywhere – at school, work, the gym and in transit. Flip-top closures also mean multitaskers can open and consume their beverages using just one hand and therefore enjoy their favourite drinks more easily.

Unique features

- Tamper evident ring retained in the overcap
- Smooth lip touch and no sharp edge
- Re-closable with a single click, ensuring the correct closing
- No detachable parts
- One hand opening
