## Flip & Scoop

The Baby Formula Flip Cap & Scoop is an innovative hinged lid with pre-assembled scoop ensures safe and hygienic dosing of the milk powders. This 130mm Snap-On cap features a patented tamper-proof strip at the opening of the lid, that permanently breaks away upon first use, indicating that the product is tamper-free.

The cap also contains an optional NFC anti-counterfeit chip that can verify the validity and authenticity of the product.

With the highest quality production methods for baby formula as a priority, material food approved PP are used. Furthermore, the production environment of this cap is in a clean room, and BRC certificated.

## Anti-Counterfeit

Anti-counterfeiting packaging aims to prevent imitation and confirm the safety and authenticity of the goods. The Baby Formula Flip Cap contains an optional NFC (Near Field Communication) chip that connects to smartphones and displays product data. No special device is required. The chip automatically activates within a 4-inch range, enabling customers to see where the formula is produced. Wireless and doesn't require batteries; this technology is virtually impossible to replicate. The chip doubles up as an anti-thief device, triggering the detector alarm when not paid. The chip data can be updated at any time without requiring the chips to be reprogrammed.

## The Scoop

- Stackable design
- Venting slits
- Wide and stable handle
- Hygienically separated from the powder
- High comfort and convenience
- Optimum pouring features
- Material food approved PP

## The Lid

Cap is for tin plate and composite cans  
Strong hinge and stabilized opening position  
Large grip for opening and closing  
Optimal stacking: lid/lid and lid/can  
Material food approved PP
