We offer a wide range of honey caps that are convenient, stylish and intuitive to use. A perfect example is the 27mm Snap-On Oval Flip & Valve. It provides the optimal dispensing experience with just a simple squeeze!

This oval valve closure has two patented tamper evident functions. The first is a tamper-evident strip at the front of the flip lid where it will break automatically when the consumer opens the cap for the first time. The second is a breaking rim inside that detaches from the closure wall when the closure separates from the bottle. Hence the consumer can be assured that the product has not been tampered with, therefore no need for an extra security label.

The closure has a functional design. The flip lid opens and closes conveniently with one hand, thanks to the solid butterfly hinge. The cap covers the complete top of the closure and can be used for customisation such as engraving a logo or other design.

Unique benefits

- Tamper evident
- Cost-effective solution
- Continuously controlled dispensing
- Optimised functionality
- Easy to open
- Valve and non-valve orifices available
- Suitable for many different viscosities
- Wide array of bottle geometries possible
- Top-down use feasible

Specifications

- Neck finish: snap-on 27 mm
- Suitable for PET and PP/PE bottles
- Orifices: 10 mm and valve
- Valve diameter: 11mm
- Inner and outer tamper evident functions
- Material PP
- High gloss surface finish
- Almost infinite range of colours
- Suitable for Food and Personal Care applications
